

# STS

SOFT TISSUE SUPPLEMENT  
DATA SHEET

ortesi  
3D printed braces & orthotics

## PPT – BLUE (STANDARD)

---

PPT is a versatile, comfortable, durable Soft Tissue Supplement (STS), and its ability to absorb rapid repetitive shock (attenuation) is almost twice that of other protective materials. PPT also retains 95% of its pressure-absorbing capacity, even under the extreme conditions of daily running.

AVAILABLE IN THE FOLLOWING THICKNESSES:

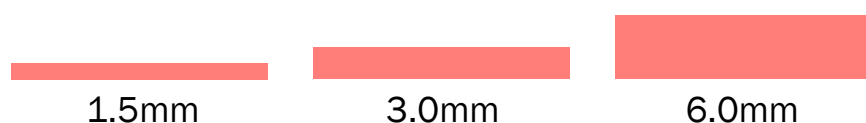

## PORON – RED (SLOW RELEASE)

---

PORON – RED is a slow rebounding cushioning Soft Tissue Supplement (STS) that is a unique custom contouring material that will continue to rebound to its original state slowly after each use. A good low impact absorption material that conforms to the foot for long-term comfort and excellent compression-set resistance that will not break down with repeated use.

AVAILABLE IN THE FOLLOWING THICKNESSES:

## CAMBRELLE

---

CAMBRELLE is a resilient, high performance material designed specifically for orthotics. The resilience, moisture management, comfort and deodorizing capabilities of CAMBRELLE ensures it stands out as the ultimate solution for lining the underside of cover extensions.

The material has high air permeability and high water permeability. The infusing technique not only provides anti-bacterial, anti-mould and anti-static properties but also strength.
